Our standpoint

The current technologies are definitely not user friendly, thus making many of us unable to benefit from the latest technology improvements .

Our mission

We create and develop innovative solutions with the aim of making them work for the greatest number of people

Our first product

With our first product, called e-lio, we are focused on the residential care markets (retirement homes, assisted-living residences, hospitals ...). e-lio was developed to enhance and strengthen the links between the establishments staff, the residents and their families

Our partnership philosophy

We are building strong and fruitful partnerships with other market players to provide our customers with the most ethical and valuable solution accordingly to their requirements and expectations

Our awards

- Trophées National du Grand Age award (with the Centre Hospitalier de DOUAI) - 2012
- HIT Award (health information technologies) - 2012
- IBM Innovation award - 2010
- Concours Malakoff Médéric award - 2009
- Trophée National du Grand Age - 2009
- OSEO competition winner – 2007

Technosens in the media :

Driven by a human perspective on technology, the multidisciplinary team of Technosens specialists is working to ensure that our solutions are not only at the forefront of the technology but also respectful of human beings.

Innovation is the heart of our motivations and we work in a close cooperation with famous labs, both in the field of human-focused sciences (sociology, neurology, etc.) and in machine-focused sciences (physics, math, etc.).

Since its creation in 2007, Technosens is advised by an "Ethic and Scientific" Board which ensures that best practices and ethics are followed in each of our technical improvements.

Founded in 2007, the Ethics and Scientific Committee is made up of top research and health specialists, especially in the fields of human sciences and engineering sciences.

Thanks to this Board, our ideas and products have undergone extensive testing and are enriched with highly valuable feedback.

The following prominent specialists make up our team:

- **Bernard CROISILE** - Neurologist *Neurologic Hospital (69)*
- **Thierry DARNAUD** - Psychomotricist and family therapist *CHU de Montpellier (34)*
- **Bernard ESPIAU** - Assistant Scientific Director at the Technological Development Office *INRIA (38)*
- **Eric FIAT** - Philosopher *Université de Marne La Vallée (77)*
- **Régis GONTHIER** - Gérontologist *CHU de Saint-Etienne (42)*
- **Philippe MALLEIN** - Sociologist *PACTE / CNRS*
- **Corinne MESTAIS** - Health Technologies Program Manager *CEA (38)*
- **Pascal PIZELLE** - Change Management specialist *Grenoble Management School (38)*
- **Louis PLOTON** - Psychiatrist / Professor in Gerontology *Health Laboratory (69)*
- **Gérard UZAN** - Ergonomics specialist *Computer Ergonomics Laboratory (75)*

Technosens is gathering together expertise and knowledge that share its philosophy such as:

- Mutual insurance and social security players
- Internet services providers
- Software and equipments developers
- home caregivers
- Associations
- Universities
- Chambers of Commerce and Industry
- ...

Through a partnership with us you'll be able to:

- **Offer your services directly to a targeted and specific market**
- **Enter in the connected TV market**
- **Benefit from the other services of our unique platform**

They have already joined the community:

e-lío is a user friendly platform dedicated to residential care markets (retirement homes, assisted-living residences, hospitals ...) that enhances the relationships between the caregivers, the residents and their families.

The establishment's staff have access to a secured website www.e-líoManager.com thus making them able to animate the residence (week activities, day menus, video calls, messages, ...), to share the communication made within the establishment (activities , pictures, news,...) with all the families and to benefit from optional services (IPTV, nurse call coupling, home automation,...)

For families it is piece of mind, with a computer and on a dedicated web portal www.e-líoFamily.fr they can get information from the caregivers (News, pictures, messages, activities) and have access to a wide range of services (video calls, photos, messages, ...) to communicate with their Parents.

From the perspective of the resident they have access to many services through some unique equipment. This equipment, composed of video camera, a central unit and a 3 buttons remote control which is a phone as well, is connected to its Televisions and gives them access to a lot of connected TV services such as: Television, phone calls, video calls, radio, pictures sent by family, games ...

Thanks to e-lío the families are relieved and get a better understanding of the caregivers' actions, thus obviously improving their relationships and facilitating the medical follow-up of the residents.

For professionals, from any computer or telephone :

- Animation of the establishment (activities, menus, pictures)
- Communication with the families (news, pictures, messages)
- Video Calls
- Nurse call coupling
- Adaptation to the resident's autonomy

For families, from any computer, tablet or connected smartphone:

- Audio and video Calls
- On-line information news
- Communication with the resident (pictures, messages, diary)
- Communication with the establishment (messages, pictures,...)
- Advises and information

For residents, from their rooms on their television screens:

- Easy to use television remote control
- User friendly telephone
- Appels vidéo
- Video Calls
- Pictures, messages and e-mails
- Radio, home automation...
